

EDUCATION

Thang Long University
Major: Computer Science
2023 – Present

TECHNICAL SKILLS

Frontend

- Angular
- TypeScript
- JavaScript
- HTML5
- CSS3, SCSS
- TailwindCSS

State & Async

- RxJS
- BehaviorSubject

Tools

- Git
- GitHub
- Vercel
- Render

Core Skills

- Responsive Design
- REST API Integration
- Component-based Architecture
- Routing

LANGUAGE

English (TOEIC 650+)

PROFESSIONAL SUMMARY

Frontend Developer Fresher with hands-on experience in Angular, TypeScript, RxJS, and RESTful APIs through enterprise projects and personal applications. Skilled in building responsive user interfaces, implementing new features, and resolving UI issues. Passionate about frontend development and eager to grow as a Frontend Developer in a professional environment.

WORK EXPERIENCE

OSP Group | 06/2025 – 08/2025

Frontend Developer Intern

- Studied business requirements and resolved issues for the **ChonSo** project based on documentation and feedback from Testers and Business Analysts (BA).
- Updated and enhanced UI features for the Insurance module in the **Mobifone Plus** project using Angular.
- Developed and updated UI features for the **Travel eSIM** module using Angular, ensuring stable behavior across testing environments.
- Investigated and fixed UI and functional bugs based on QA/BAT reports before delivery.
- Collaborated with QA engineers, testers, and Business Analysts to clarify requirements, reproduce issues, and verify bug fixes prior to release.

PERSONAL PROJECT

Zamy | E-commerce Website

Tech Stack: Angular, TypeScript, RxJS, TailwindCSS, RESTful API, Node.js, Express

Live Demo: <https://zamy-minhnt09.vercel.app>

Source Code: <https://github.com/Minhnt09/Zamy>

- Developed a responsive e-commerce web application with product listing, product detail, shopping cart, checkout, favorite products, and admin product management features.
- Built reusable standalone Angular components and configured client-side routing for customer-facing pages and admin pages.
- Integrated RESTful APIs to fetch product data, display product details, and create customer orders through a backend service.
- Implemented shopping cart state management using RxJS BehaviorSubject and localStorage to persist and synchronize cart data across components.
- Created a checkout flow with reactive forms, customer information validation, order summary, and payment success navigation.
- Deployed the frontend on Vercel and backend API on Render for public access.
